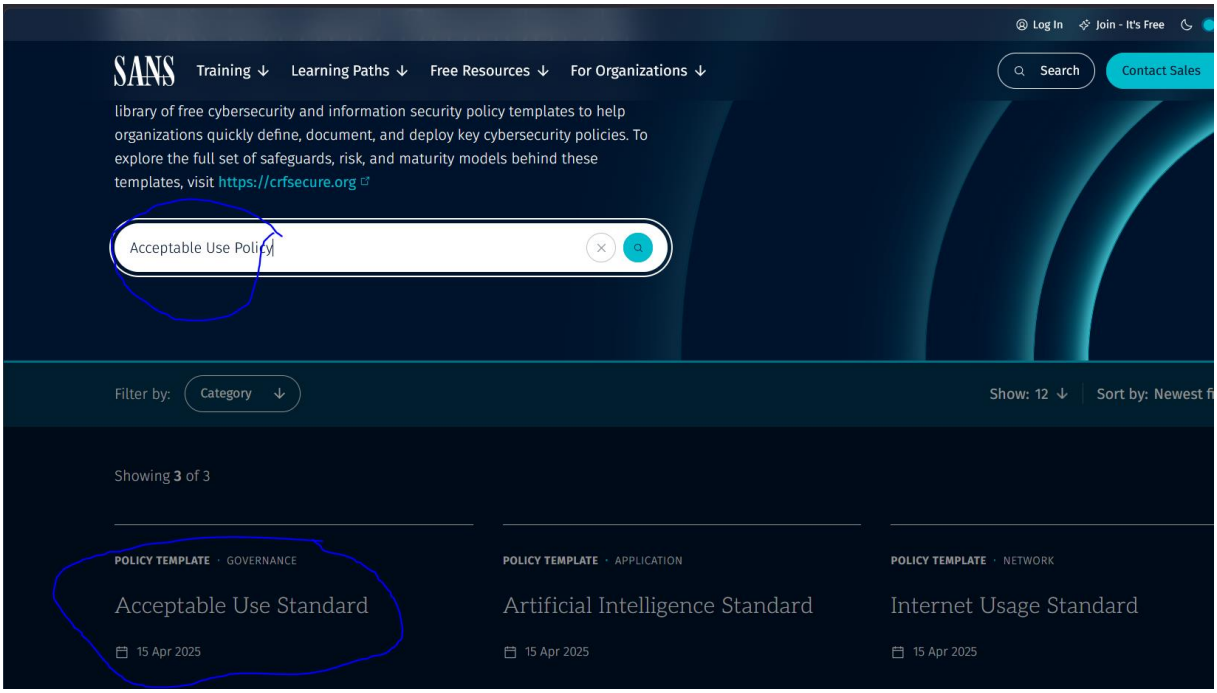
SECURITY POLICY DEVELOPMENT PROJECT REPORT.

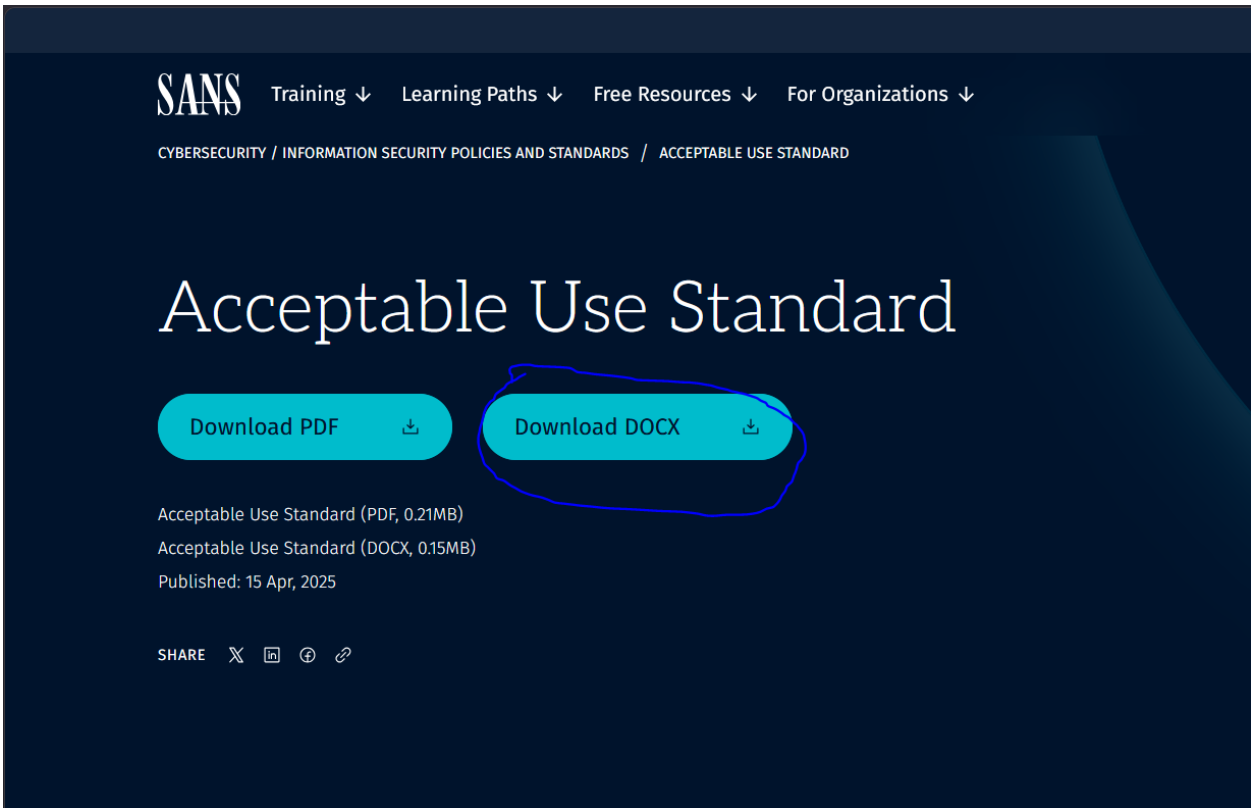
1. CRAFTING AUP (ACCEPTABLE USED POLICY)

- I search for SAN on you search engine and type in **Acceptable Use Policy**.



Then I clicked on the acceptable use policy to create the AUP policy.

- Then I downloaded the PDF format of the policy to make my own policy.



- Then I edited the document to fit my company “Cybertech”.

Then I repeated the steps to create the password policies and ACL policies.
